

**University of Delaware
Academy Street Building
Newark, DE**

CLIENT: University of Delaware
Department of Facilities Management
222 South Chapel Street
Newark, DE 19713
Gina Sinovich (302)831-1750

COMPLETION DATE: 2001

DESCRIPTION:

Apex Engineering Incorporated performed land surveys and completed the design of the site work. In particular, professional services included preparing the site construction plans, details and specifications, and provided the grading, drainage and storm water management design in accordance with the State of Delaware sediment and storm water regulations. Other services also included construction layout and certified construction review of the sediment and storm water features during construction of the site work.
